

KIBO-X Panel

The KIBO-X panel is the professional for heavy duty tasks. The vertical and x-shaped connecting web structure in the PP cavity board provides maximum flexural strength with a very low dead weight.

The KIBO-X panel is ideally suited for large sized applications: for big banners, for big objects in trade fair and exhibition stand construction and for big models. It is also ideal for the automotive sector for interior fittings in HGVs, trucks and motorhomes.

Properties

- Maximum flexural strength and stability
- Shockproof and impact resistant
- Lightweight
- Easy to process
- Resistant to moisture and weathering
- Resistant to low and high temperatures
- Long-lasting
- Easy to clean
- Thanks to "aircushion" technology, satin effect boards have an exceptionally smooth surface
- Suitable for digital or screen printing thanks to Corona treatment
- Can be laminated
- Recyclable

Standard designs

Panel format: 3,000 x 2,400 mm
(size 3,000 mm effective parallel to cavity orientation)
Colours: natural, white, grey RAL 7001, black

Optional features

- Increased UV-stability
- Flame retardant
- Anti-static
- Electroconductive
- Corona-treated
- Precut blanks and oversize formats
- Special colours and 2-colour boards
